**Allowable subject matter**

Claims 1-44 are allowed.

The following is an examiner's statement of reasons for allowance: The prior art neither discloses nor suggests the following limitations, in combination with the remaining elements as disclosed in claims:

- A first voltage disconnecting switch for disconnecting the first voltage source from the current source, wherein the first voltage disconnecting switch is adapted to switch between a voltage control mode and a current control mode such as required by claim 1;
- A first voltage source for providing a first voltage between each emitter and the extracting electrode to switch on the beam current wherein each field emitter beam source further comprises: a current source for providing a predetermined beam current; a first switch electrically coupled to the first voltage source to switch on a beam current and a second switch to switch off the beam current such as required by claim 16;
- A step of switching on the beam current by applying the first voltage between the emitter and the extracting electrode, wherein the first voltage disconnecting switch is adapted to switch between a voltage control mode and a current control mode such as required by claim 27.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably
